EXPERTISE

TypeScript | Go | Python | SQL | React | Next.js | Tailwind CSS | Node.js | PostgreSQL | Redis | Docker | Kubernetes | AWS | Terraform

EDUCATION

M.S.
in Computer Science
University of Illinois Urbana-Champaign
2015-08-15 – 2017-05-20
GPA: 3.91

B.S.
in Computer Engineering
Purdue University
2011-08-20 – 2015-05-10
GPA: 3.78

EXECUTIVE PROFILE

Versatile Full Stack Engineer with 7+ years of experience architecting high-concurrency microservices, real-time web applications, and scalable PostgreSQL database schemas. Proven track record leading distributed engineering teams from conception to global production launches.

EXPERIENCE & LEADERSHIP

Staff Platform Engineer • Apex Cloud Solutions — 2021-03-01 – Present

- Spearheaded architectural re-platforming of legacy monolithic order processing system into 14 distributed Go microservices handling 45,000 req/sec at peak.
- Reduced P99 API latency from 420ms to 28ms by introducing Redis cluster caching layer and gRPC transport protocols.
- Architected automated Kubernetes deployment manifests and Helm charts deployed across 3 AWS multi-region clusters.
- Mentored 8 junior and mid-level engineers, running weekly architecture review sessions and code craftsmanship workshops.

Senior Software Engineer • Catalyst Financial Technologies — 2018-06-01 – 2021-02-28

- Built and maintained PCI-compliant credit card processing pipeline managing $850M in annual transactional volume.
- Implemented zero-downtime database schema migrations for PostgreSQL tables containing over 250 million records.
- Developed end-to-end audit logging infrastructure using Apache Kafka and Elasticsearch for regulatory compliance.

Full Stack Developer • Kinetic Web Labs — 2017-06-01 – 2018-05-31

- Engineered customer-facing React SPA dashboard integrated with Express and Node.js REST API endpoints.
- Optimized Webpack bundle sizes by 44% through code-splitting, tree-shaking, and lazy-loading of secondary routes.

FEATURED PROJECTS

Distributed Task Queue Engine (Go, Redis, Docker, Prometheus) — 2023-01-01 – 2023-08-30 — github.com/marcusvance/task-queue

- High-throughput async job worker system with Redis persistence, backpressure handling, and exponential backoff retry semantics.

Event Horizon Analytics (Node.js, PostgreSQL, WebSockets) — 2022-03-01 – 2022-11-15 — github.com/marcusvance/event-horizon

- Real-time telemetry aggregation engine processing 100k events/sec with WebSockets and TimescaleDB analytics.

HONORS & CERTIFICATIONS

AWS Certified Solutions Architect – Professional — Amazon Web Services (2023)

Certified Kubernetes Administrator (CKA) — Linux Foundation (2022)
